➔ Dr. Geoff Wan

As a general dentist and a Certified Bioclear provider, Dr. Geoff actively manages his practice and team in Penrith, NSW.

His professional focus extends to cosmetic, restorative, orthodontic and CAD/CAM dentistry, with a particular emphasis on smile design. Dr. Geoff holds the title of Fellow in the Academy of General Dentistry and is a proud member of the Australian Dental Association, American Academy of Craniofacial Pain, and the Academy of General Dentistry. He has also successfully completed the EODO Mini Orthodontic Residency.

➔ Dr. Edward Boulton

Dual qualified in a Bachelor of Physiology (HON) followed by a Bachelor's in Dental Surgery and successful practice owner since 2008.

Dr Ed's professional focus is on root canal, restorative work, dental implants, and smile makeovers. He is passionate about leveraging advanced dental technology for improved patient care. Certified as a Bioclear Provider, he is one of only two Australian dentists with this distinction. Dr Ed now shares his expertise in Core Anterior, Core Posterior, Advanced Anterior, and full mouth rehabilitation with Amalgadent Dental.

BECOME A TRAINED BIOCLEAR PROVIDER

By Amalgadent Dental

Embark on an engaging one-day course exploring the groundbreaking foundations of the Bioclear Method. Pioneered by renowned clinician Dr. David Clark, this course is designed to introduce dentists to the revolutionary techniques and materials integral to the Bioclear Method. The primary emphasis is on the application and efficiency of heat injection overmoulded composite in daily practice.

Through personalised lectures, hands-on exercises, and real-world case scenarios, participants will acquire the essential skills to confidently integrate this innovative approach into their clinical practice.

Learning outcomes:

- Understand the foundational principles and clinical applications of the Bioclear Method, and why it is a stand alone method in comparison to current outdated market trends
- Master the heat injection technique for overmoulded composite, a pivotal aspect of the Bioclear Method
- Skillfully restore open gingival embrasures, ensuring optimal anatomical contours and a natural, seamless appearance
- Confidently create smooth Class II molar restorations with broad contacts using the Bioclear Method
- Demonstrate proficiency in contouring and polishing techniques, achieving a brilliant smooth finish on restorations for enhanced aesthetics and longevity
- Learn and perform the three essential steps needed to achieve rock-solid posterior composite contacts
